

Below is the steps for running this project:

- If this is not first time running, remove previous folder first using:

```
rm -R CarND-Extended-Kalman-Filter-Project-master
```

- You may need to select 'y' for certain file while removing folder. Post that, you can run below code to start project running:

```
git clone https://github.com/MagicSHX/CarND-Extended-Kalman-Filter-Project-master.git
```

```
cd CarND-Extended-Kalman-Filter-Project-master
```

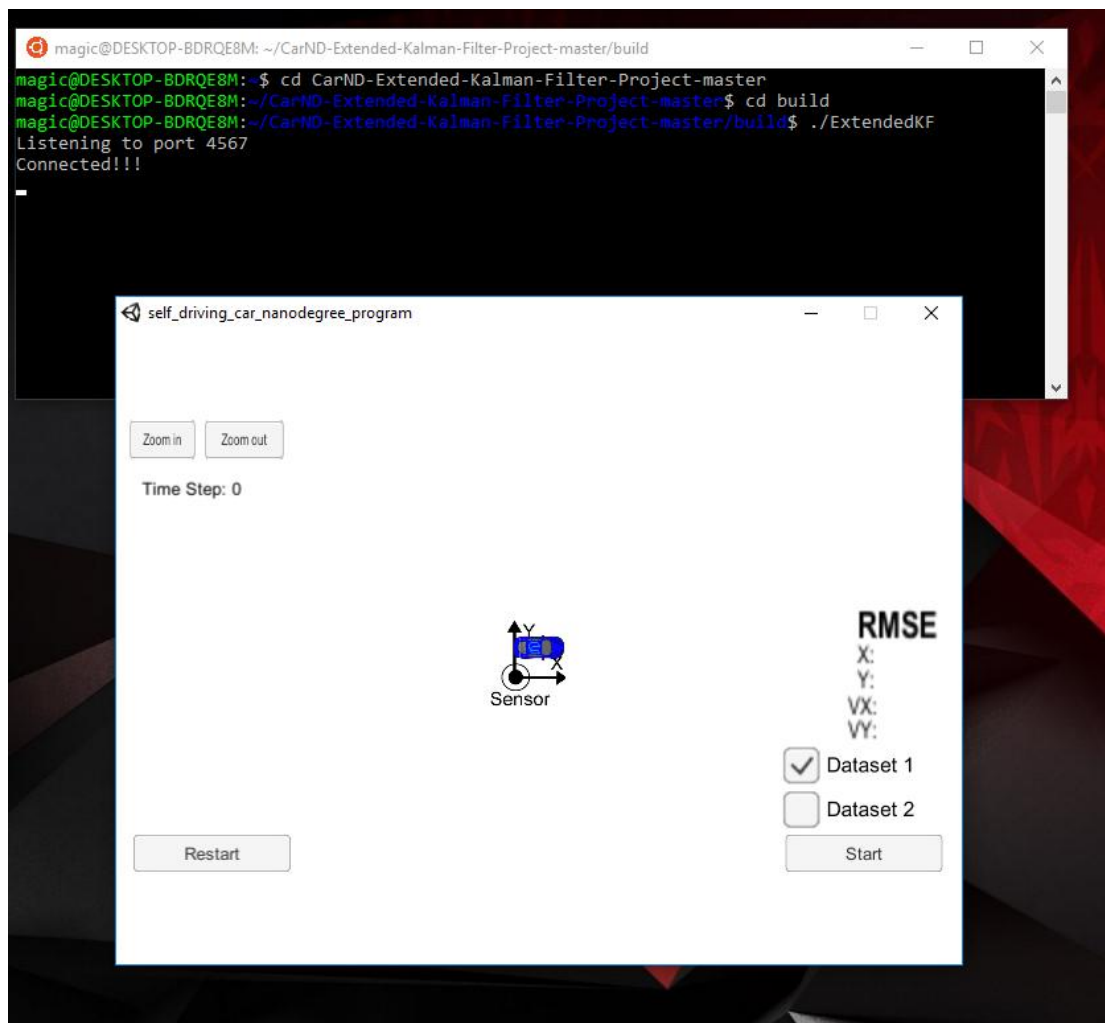

```
mkdir build && cd build
```

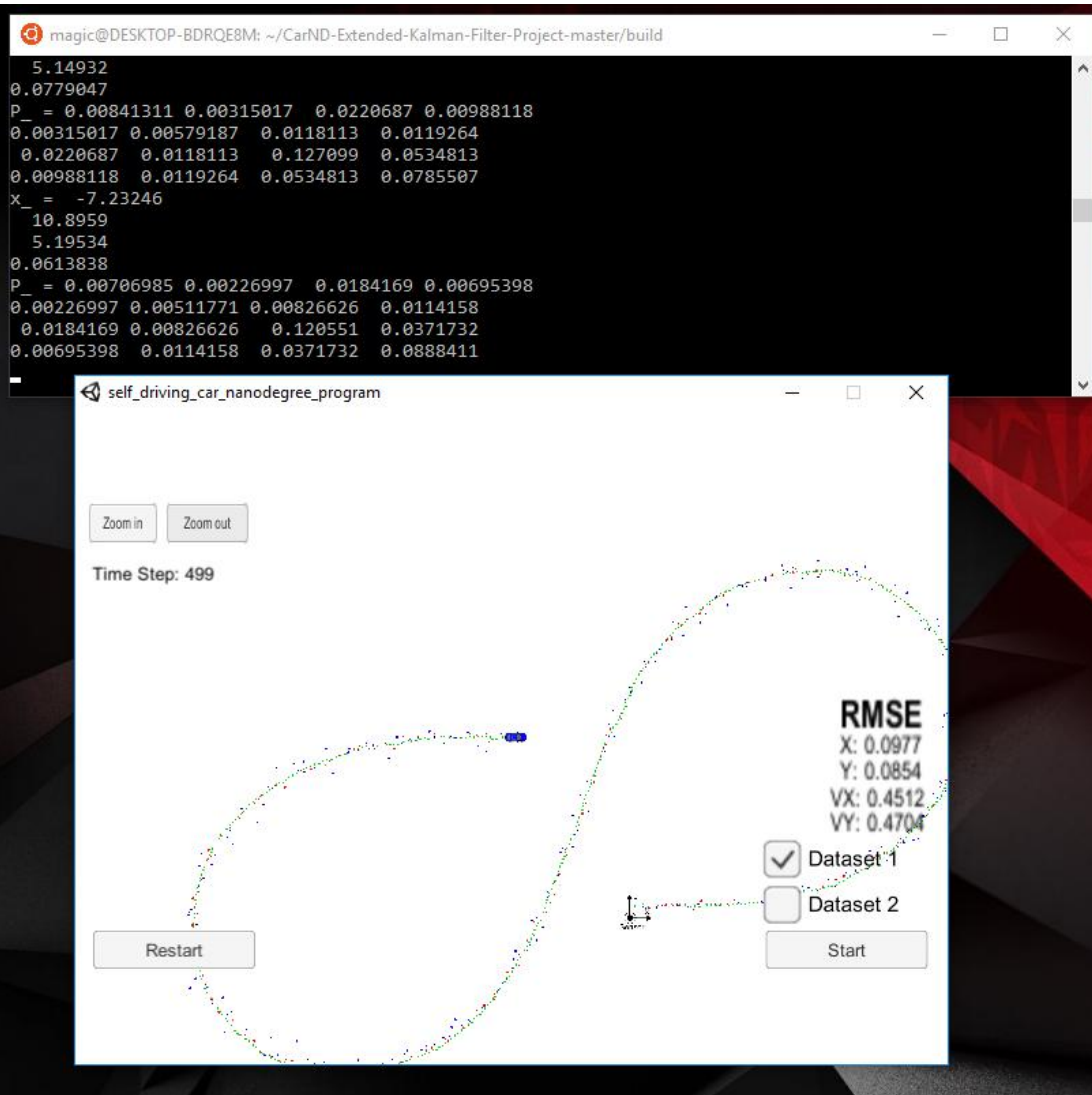

```
cmake .. && make
```

- Last step: making sure simulation started before running below code in ubuntu:

```
./ExtendedKF
```

```
magic@DESKTOP-BDRQE8M: ~/CarND-Extended-Kalman-Filter-Project-master/build
